

WHY CHOOSE HSC HEALTH & RESIDENTIAL SERVICES?

"Having a home health care aide for our daughter a few hours a week has given us the opportunity to take care of ourselves. Our daughter's face lights up when her aide walks through the door every week. The staff is always courteous and responsive whenever we call. We have had a great experience." — Jen L.

Our philosophy: As a community health provider, our mission is to ensure that our clients and their families have access to quality rehabilitative and specialty care services in the comfort of their homes and community in a manner that is culturally appropriate.

Reliable, skilled and dedicated professionals: Our team consists of energetic and compassionate registered nurses, licensed practical nurses, home health aides and personal care aides.

A range of services and flexible schedules: We use a multidisciplinary approach to meet each client's individual needs and maintain open communication with primary care providers. We establish a positive relationship with your health care provider to ensure you get the best care possible.

Top industry standards: HSC Home Care, LLC is accredited by the Community Health Accreditation Program (CHAP), an independent accrediting body for community-based health care organizations. CHAP accreditation demonstrates that we meet the highest quality standards.

HSC HEALTH & RESIDENTIAL SERVICES AND HSC HOME CARE, LLC ARE PART OF THE HSC HEALTH CARE SYSTEM, a nonprofit health care organization with more than 100 years of experience. The System combines the resources of a care coordination plan, pediatric specialty hospital, home health agency and parent foundation to offer a comprehensive approach to caring, serving and empowering individuals with disabilities.

HSC HEALTH & RESIDENTIAL SERVICES

When you need medical care at home, HSC Health & Residential Services is there to provide a flexible and individualized plan to meet your care needs.

Whether it is a well mom visit or transitional care for special health care needs, we offer family-centered care in the home as well as one-on-one training to support you and your family. At HSC Health & Residential Services, we provide care and services across the entire life span. We offer specialized care for pediatric services for infants, children and young adults with disabilities and have a successful history serving these clients in the Washington metropolitan area.

About Us

HSC Home Care, LLC is a certified home health agency in the District of Columbia. In Maryland, HSC Home Care does business as HSC Health & Residential Services, which allows us to provide continued in-home health services across the region.

HSC Health & Residential Services is licensed as a residential service agency by the Maryland Department of Health and Mental Hygiene's Office of Health Care Quality (license R3528). Our clients range from infants to adults with complex disabilities that include developmental delays, cerebral palsy or brain injuries. We take pride in promoting an environment of community-based care that enables those we serve to live independently and supported while receiving the medical care they need.

FOCUSED CARE SERVICES WITH A POWERFUL STRATEGY

We are here to help you feel comfortable taking care of your child's health or your parents at home, with the goal for you and your family to become as independent as you can in carrying out a plan of care. We partner with your health care team, your doctor, your pharmacist and other members of the team to promote the best health outcomes possible.

We not only help each client, we also strive to help their family by connecting individuals with special health care needs to essential community resources for job assistance, financial counseling, food banks, recreation, education and more.

OUR SERVICES

Skilled Nursing (RN & LPN)

Our registered and licensed practical nurses observe each new client to assess individual care needs, and then work with the family to carry out a physician's plan of care. Skilled nurses also teach families about medication management, home safety and other issues to encourage independence.

Home Health and Personal Care Aides

Home health aides and personal care aides are trained to recognize developmental milestones and the value of therapeutic play. They can perform tasks to help with daily living, such as bathing, dressing and toiletry needs, as well as assist with medication, meal preparation and laundry.

Respite Care

Raising a child with a chronic illness or taking care of a loved one with a disability can present many challenges and there may come a point that you need some time away from being a caregiver. Respite care is an essential part of the overall support that families may need to keep their loved one at home.

Infusion Therapy

HSC Health & Residential Services offers infusion therapy in the home for children who need to receive medication through a needle into a vein (using an IV bag). Our nurses are trained to administer this type of intravenous therapy to provide hydration and nutrition support or other prescribed medications.

Well Mom and Baby Visits

Mothers are given lots of information during their hospital stay on how to take care of a new baby, but when you get home, you may find that you need a little help. We offer well mom and baby visits to make sure you and your baby are adjusting to being home.

Client/Caregiver Education

Each family is given a learning assessment during the admission process and all services are provided in an open learning environment. Our team will work to show you how to perform procedures or treatments that are part of a care plan, in a way that best meets your needs.
