# A1C: Do you know what your "number" is?

## Is your blood sugar under control?

Testing your blood sugar lets you know how well you are managing your diabetes. Managing your diabetes well can help you avoid diabetes problems.

Testing your blood sugar at home only tells you how well you are doing at the moment you do the test. At different times, your blood sugar could be higher or lower. To know the whole story, you need an A1C test.

## What is an A1C test?

An A1C is a blood test done at your doctor's office to tell you how well you are managing your blood sugar over time. Your A1C number tells you your *average* blood sugar for 2-3 months before the test.

**Under 7%**

## What is your "number?"

The American Diabetes Association (ADA) says that A1C should be less than 7%. Your doctor may set a different A1C goal for you and it may change over time. Ask your doctor what your A1C goal should be. Your final goal should be less than 7%.

Blood sugar can be **high** one day...

And **low** the next...

A1C is your *average* blood sugar for 2-3 months

## How often should you have an A1C test?

A1C tests should be done every 3 to 6 months. Ask your doctor what your last A1C was and when you should have your next test.

Talk to your doctor about:

- What your A1C goal should be
- How often you should have an A1C test

# Tracking your A1C

## Know Your "Number!"

### The American Diabetes Association (ADA) A1C goal: *Less than 7%*

- You and your doctor will set an A1C goal. This goal may change over time.
- Work with your doctor to reach a final goal less than 7%.

### Get your A1C checked every 3 to 6 months\*

Keep track of your A1C numbers on the chart below

- In the chart below, write down the date and your test result
- Write down when you should have your next test
- Fill in the circle on the graph closest to your test results
- Track your progress over time

My A1C goal:

Date:						
Next test:						
A1C number:	%	%	%	%	%	%
11.5%	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11.0%	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

\* Ask your doctor how often you should get an A1C test

## Map Your Course To Get Results

Objective: Become an active participant to improve your health and decrease your risk for diabetes complications.

Tests and Exams	Checklist
 <b>A1c</b>	<input type="checkbox"/> Ask your doctor to measure your A1c every 3 months. Record your A1c results on your Health Care Card or Personal record. Goal is $\leq 6.5\%$ <input type="checkbox"/> Test your blood glucose regularly: Before meals ( $< 110$ mg/dL) Two hours after meals ( $< 140$ mg/dL) Bedtime 100-140 mg/dL
 <b>Blood Pressure</b>	<input type="checkbox"/> Record your Blood Pressure (BP) at every office visit and as directed by your doctor. Keep track of your BP results on your Health Care Card or Personal record <input type="checkbox"/> Take medications prescribed by your doctor to help lower your blood pressure <input type="checkbox"/> Keeping your blood pressure and blood glucose close to goal can prevent kidney, heart, eyes and nerves from damage
 <b>Cholesterol &amp; Lipid Profile</b>	<input type="checkbox"/> Get blood test done for Lipids once a year, or more often if you are taking lipid-lowering medication <input type="checkbox"/> Keeping levels within normal limits will help protect your heart and blood vessels from damage. Record your results will help you track your progress <b>Total Cholesterol</b> ..... Less than 200 mg/dL <b>LDL Cholesterol</b> ..... Less than 100 mg/dL <b>HDL Cholesterol</b> ..... Men—greater than 45 mg/dL Women—greater than 50 mg/dL <b>Triglycerides</b> ..... Less than 150 mg/dL
 <b>Dilated Eye Exam</b>	<input type="checkbox"/> Get dilated eye exam from eye care specialist every year. It is very important to have the results sent back to your doctor, so a copy can be a part of your health history <input type="checkbox"/> Call your doctor right away if you have any sudden change in your vision
 <b>Foot Care</b>	<input type="checkbox"/> At the doctors office: Remove shoes and socks in the exam room at every visit, be sure your doctor inspects your feet and see a podiatrist for special problems <input type="checkbox"/> At home: Inspect your feet daily for cuts, blisters, swelling, dry skin and cracks; Do not go barefoot. Be sure your shoes and socks fit properly.
 <b>Kidney Function</b>	<input type="checkbox"/> Ask doctor to measure kidney function (protein in urine) every year <input type="checkbox"/> Record results of your yearly kidney tests: "microalbumin" (measures protein in urine) and/or the "GFR" (measures kidney function). <input type="checkbox"/> Talk with your doctor about lifestyle actions you can take, such as keeping your blood pressure less than $130/80$ & not smoking
 <b>Other things you can do to Take Care of Your Diabetes</b>	<b>Get involved, be an active participant in your healthcare decisions.</b> <input type="checkbox"/> If Smoker--Stop smoking <input type="checkbox"/> Flu shot every year (October/November is best) and pneumonia vaccination every 5 years <input type="checkbox"/> Have a meal plan and physical activity plan <input type="checkbox"/> Know your health plan benefit coverage for diabetes education, meter strips, shoes and medications <input type="checkbox"/> Utilize your community resources and consult with diabetes educator, pharmacist, dietitian, American Diabetes Association, local health department ect.
